*Korea Press Foundation Media Users Survey 2025 — team project extract*

## About this dataset

The Media Users Survey (언론수용자 조사) has been conducted by the Korea Press Foundation every year since 1984. The 2025 round interviewed 6,000 Korean adults aged 19 and over, face to face, about how they use newspapers, television, radio, magazines, portals, messengers, SNS, online video, short-form video, OTT services, generative AI and podcasts, and about what they think of the Korean press. It is the standard reference source on media use in Korea.

Each row is one respondent. There are 1,868 rows and 125 columns. Every respondent answered the attitude questions, so those are complete.

The 2025 round interviewed 6,000 people. This extract is a random sample of 1,868 of them, drawn so that all three team-project datasets are the same size and the choice of dataset is purely one of subject matter.

The original file has 223 columns with names like Q34_2 and BQ7, and a questionnaire written in Korean. This extract renames every variable in English, combines the weekday and weekend questions into single weekly measures, and adds four index scores. The original data, questionnaire and report are in the download package from the Korea Press Foundation if you want to go back to the source.

## Media use: the denominator question

This is the one thing to get right with this dataset. For each medium there are two variables:

- use_… — did you use this medium at all in the past 7 days? (1 = yes, 2 = no)
- days_… — how many days in the past week, from 0 to 7

In the days_ variables, a person who did not use the medium at all is scored 0, not missing. So a mean of days_newspaper across the whole file answers the question "how many days a week does the average Korean adult read a newspaper?" The answer is 0.32, because only 8% read one at all.

*If instead you want to ask "among people who do read newspapers, how often do they read?", first keep only the rows where use_newspaper equals 1, and then take the mean. The two questions have different answers, and both are legitimate, but they are different questions. Say in your report which one you are answering. This is the most common mistake made with this dataset.*

## Missing values

This survey has very few unusable answers, because the interviewer asked every question face to face. Two codes appear:

- 998 = Don't know. This appears only in the five journalism_fn_ variables.
- −1 = Not applicable. This appears only in source_recognition, which was asked only of people who had used internet news.

Recode both as missing before analysis. The starter notebook shows you how. Note that 999 is not used for any answer in this file.

## The four index scores

Four variables at the end of the file are index scores, each the mean of the items named in its description, so that the required tests have outcomes that can be treated as continuous. All four hold together well statistically (Cronbach's alpha between .69 and .89). Every component item is also in the file on its own, so you may build your own index instead, or analyze single items.

*Watch the direction. press_eval, press_role and journalist_eval all run from a low to a high opinion of the press. press_problem runs the other way. A high score means the respondent sees the problems in Korean journalism as more serious. Do not put them in the same sentence without checking which way each one points.*

## A note on the "n" column

The n column gives the number of respondents with a usable answer. When you cross two variables, your working sample is the number of people with a usable answer on both. Always report the n your test actually used.

## Variables

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| `caseid` | Case identifier | id | 1868 | 2–6000 |
| `region` | Region of residence | categorical (ANOVA factor / chi-square) | 1868 | 1=Seoul; 2=Busan; 3=Daegu; 4=Incheon; 5=Gwangju; 6=Daejeon; 7=Ulsan; 8=Sejong; 9=Gyeonggi; 10=Gangwon; 11=Chungbuk; 12=Chungnam; 13=Jeonbuk; 14=Jeonnam; 15=Gyeongbuk; 16=Gyeongnam; 17=Jeju |
| `sex` | Sex | binary (t test grouping / chi-square) | 1868 | 1=male; 2=female |
| `age` | Age in completed years | continuous | 1868 | 19–99 |
| `hhsize` | Number of people in | continuous | 1868 | 1–9 |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | the household | | | |
| hhtype | Household generational composition | categorical (ANOVA factor / chi-square) | 1868 | 1=one generation; 2=two generations; 3=three generations; 4=four or more; 5=other |
| educ | Highest level of education | categorical (ANOVA factor / chi-square) | 1868 | 1=middle school or less; 2=high school graduate; 3=some college or college graduate; 4=graduate school |
| occupation | Occupation | categorical (ANOVA factor / chi-square) | 1868 | 1=agriculture/fishery; 2=self-employed/retail; 3=service; 4=manual labor; 5=skilled trades; 6=clerical/office; 7=professional; 8=technical professional; 9=managerial; 10=homemaker; 11=student; 12=unemployed or retired; 9997=other |
| income | Monthly household income before tax | ordered scale (may be treated as continuous) | 1868 | 1=under 1m KRW; 2=1–2m; 3=2–3m; 4=3–4m; 5=4–5m; 6=5–6m; 7=6–7m; 8=7–8m; 9=8m KRW or more |
| class | Subjective social class | ordered scale (may be treated as continuous) | 1868 | 1=lower; 2=lower-middle; 3=middle; 4=upper-middle; 5=upper |
| polorient | Political orientation | ordered scale (may be treated as continuous) | 1868 | 1=very progressive; 2=somewhat progressive; 3=moderate; 4=somewhat conservative; 5=very conservative |
| polinterest | Interest in political and social issues | ordered scale (may be treated as continuous) | 1868 | 1=not at all interested; 2=not very; 3=neutral; 4=somewhat; 5=very interested |
| voted | Voted in the June 2025 presidential election | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| np_subscribe | Household subscribes to a print newspaper | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_newspaper | Used a print newspaper in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_magazine | Used a magazine in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_tv | Used television in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_tvnews | Used television news in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| use_radio | Used the radio in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_radionews | Used radio news in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_messenger | Used a messenger service (KakaoTalk, Line …) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_msgnews | Used news via a messenger service in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_sns | Used SNS (Instagram, Facebook, Band …) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_snsnews | Used news via SNS in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_video | Used an online video platform (YouTube, Naver TV, SOOP) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_videonews | Used news on an online video platform in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_shortform | Used short-form video (YouTube Shorts, Reels, TikTok) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_sfnews | Used news in short-form video in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_ott | Used an OTT service (Netflix, TVING, Wavve, Coupang Play) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_ottnews | Used news via an OTT service in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_ai | Used a generative AI service (ChatGPT, CLOVA, Gemini, Claude) in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_ainews | Used news via a generative AI service in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_podcast | Used a podcast in the past 7 days | binary (t test grouping / | 1868 | 1=yes; 2=no |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | | chi-square) | | |
| use_podnews | Used a news podcast in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_internet | Used the internet in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_intnews | Used news on the internet in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_portal | Used an internet portal or search engine in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| use_portalnews | Used news on a portal or search engine in the past 7 days | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| days_newspaper | Days in the past week using a print newspaper | continuous | 1868 | 0–7 days (0 = did not use) |
| days_magazine | Days in the past week using a magazine | continuous | 1868 | 0–7 days (0 = did not use) |
| days_tv | Days in the past week using television | continuous | 1868 | 0–7 days (0 = did not use) |
| days_tvnews | Days in the past week using television news | continuous | 1868 | 0–7 days (0 = did not use) |
| days_radio | Days in the past week using the radio | continuous | 1868 | 0–7 days (0 = did not use) |
| days_radionews | Days in the past week using radio news | continuous | 1868 | 0–7 days (0 = did not use) |
| days_internet | Days in the past week using the internet | continuous | 1868 | 0–7 days (0 = did not use) |
| days_intnews | Days in the past week using news on the internet | continuous | 1868 | 0–7 days (0 = did not use) |
| days_portal | Days in the past week using an internet portal or search engine | continuous | 1868 | 0–7 days (0 = did not use) |
| days_portalnews | Days in the past week using news on a portal or search engine | continuous | 1868 | 0–7 days (0 = did not use) |
| days_messenger | Days in the past week using a messenger service (KakaoTalk, Line …) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_msgnews | Days in the past week using news via a | continuous | 1868 | 0–7 days (0 = did not use) |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | messenger service | | | |
| days_sns | Days in the past week using SNS (Instagram, Facebook, Band …) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_snsnews | Days in the past week using news via SNS | continuous | 1868 | 0–7 days (0 = did not use) |
| days_video | Days in the past week using an online video platform (YouTube, Naver TV, SOOP) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_videonews | Days in the past week using news on an online video platform | continuous | 1868 | 0–7 days (0 = did not use) |
| days_shortform | Days in the past week using short-form video (YouTube Shorts, Reels, TikTok) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_sfnews | Days in the past week using news in short-form video | continuous | 1868 | 0–7 days (0 = did not use) |
| days_ott | Days in the past week using an OTT service (Netflix, TVING, Wavve, Coupang Play) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_ottnews | Days in the past week using news via an OTT service | continuous | 1868 | 0–7 days (0 = did not use) |
| days_ai | Days in the past week using a generative AI service (ChatGPT, CLOVA, Gemini, Claude) | continuous | 1868 | 0–7 days (0 = did not use) |
| days_ainews | Days in the past week using news via a generative AI service | continuous | 1868 | 0–7 days (0 = did not use) |
| days_podcast | Days in the past week using a podcast | continuous | 1868 | 0–7 days (0 = did not use) |
| days_podnews | Days in the past week using a news podcast | continuous | 1868 | 0–7 days (0 = did not use) |
| min_newspaper | Average minutes per day reading a print newspaper (weekdays and weekend combined) | continuous | 1868 | 0–1440 minutes (0 = did not use) |
| min_tv | Average minutes per day watching television (weekdays and weekend combined) | continuous | 1868 | 0–1440 minutes (0 = did not use) |
| min_tvnews | Average minutes per | continuous | 1868 | 0–1440 minutes (0 = did not use) |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | day watching television news (weekdays and weekend combined) | | | |
| min_radio | Average minutes per day listening to the radio (weekdays and weekend combined) | continuous | 1868 | 0–1440 minutes (0 = did not use) |
| min_radionews | Average minutes per day listening to radio news (weekdays and weekend combined) | continuous | 1868 | 0–1440 minutes (0 = did not use) |
| mainsource | The one route used most for news in the past week | categorical (ANOVA factor / chi-square) | 1868 | 1=print newspaper; 2=television; 3=radio; 4=magazine; 5=internet portal or search engine; 6=news outlet website; 7=news outlet app; 8=news aggregator app; 9=blog; 10=online cafe or community; 11=SNS; 12=messenger service; 13=online video platform; 14=short-form video; 15=generative AI service; 16=AI speaker; 17=newsletter; 18=used none of these for news |
| press_eval_1 | The Korean press is fair | ordered scale (may be treated as continuous) | 1868 | 1=strongly disagree; 2=somewhat disagree; 3=neutral; 4=somewhat agree; 5=strongly agree |
| press_eval_2 | The Korean press is professional | ordered scale (may be treated as continuous) | 1868 | 1=strongly disagree; 2=somewhat disagree; 3=neutral; 4=somewhat agree; 5=strongly agree |
| press_eval_3 | The Korean press is accurate | ordered scale (may be treated as continuous) | 1868 | 1=strongly disagree; 2=somewhat disagree; 3=neutral; 4=somewhat agree; 5=strongly agree |
| press_eval_4 | The Korean press is free to operate | ordered scale (may be treated as continuous) | 1868 | 1=strongly disagree; 2=somewhat disagree; 3=neutral; 4=somewhat agree; 5=strongly agree |
| press_eval_5 | The Korean press is influential | ordered scale (may be treated as continuous) | 1868 | 1=strongly disagree; 2=somewhat disagree; 3=neutral; 4=somewhat agree; 5=strongly agree |
| press_role_1 | How well the press does at providing accurate information on social issues | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| press_role_2 | How well the press does at presenting diverse opinions | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| press_role_3 | How well the press does at proposing | ordered scale (may be | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | solutions to social problems | treated as continuous) | | well |
| press_role_4 | How well the press does at putting important problems on the agenda | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| press_role_5 | How well the press does at criticizing and monitoring government and officials | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| press_role_6 | How well the press does at criticizing and monitoring business | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| press_role_7 | How well the press does at speaking for the socially disadvantaged | ordered scale (may be treated as continuous) | 1868 | 1=very poorly; 2=somewhat poorly; 3=average; 4=fairly well; 5=very well |
| trust_news_general | Trust in news and current-affairs information in general | ordered scale (may be treated as continuous) | 1868 | 1=do not trust at all; 2=tend not to trust; 3=half and half; 4=tend to trust; 5=trust a great deal |
| trust_news_own | Trust in the news the respondent actually uses | ordered scale (may be treated as continuous) | 1868 | 1=do not trust at all; 2=tend not to trust; 3=half and half; 4=tend to trust; 5=trust a great deal |
| trust_alt_1 | Trust in news shared by acquaintances on SNS or messengers | ordered scale (may be treated as continuous) | 1868 | 1=do not trust at all; 2=tend not to trust; 3=half and half; 4=tend to trust; 5=trust a great deal |
| trust_alt_2 | Trust in news made by ordinary people or solo creators, not news outlets | ordered scale (may be treated as continuous) | 1868 | 1=do not trust at all; 2=tend not to trust; 3=half and half; 4=tend to trust; 5=trust a great deal |
| trust_alt_3 | Trust in news that portals themselves recommend and arrange | ordered scale (may be treated as continuous) | 1868 | 1=do not trust at all; 2=tend not to trust; 3=half and half; 4=tend to trust; 5=trust a great deal |
| problem_1 | How serious a problem: factual errors and false reporting | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_2 | How serious a problem: clickbait headlines | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_3 | How serious a problem: abusing (recycled) articles | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_4 | How serious a | ordered scale | 1868 | 1=not serious at all; 2=not very |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| | problem: biased, one-sided articles | (may be treated as continuous) | | serious; 3=average; 4=fairly serious; 5=very serious |
| problem_5 | How serious a problem: advertorial articles | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_6 | How serious a problem: articles serving the outlet's own interests | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_7 | How serious a problem: stenographic articles copied from press releases | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| problem_8 | How serious a problem: false and manipulated information ("fake news") | ordered scale (may be treated as continuous) | 1868 | 1=not serious at all; 2=not very serious; 3=average; 4=fairly serious; 5=very serious |
| journalist_1 | Rating of Korean journalists on ethics and integrity | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| journalist_2 | Rating of Korean journalists on professional expertise | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| journalist_3 | Rating of Korean journalists on social influence | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| journalist_4 | Rating of Korean journalists on contribution to society | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_1 | How much trust politicians command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_2 | How much trust senior public officials command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_3 | How much trust business executives command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_4 | How much trust legal professionals command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| occtrust_5 | How much trust journalists command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_6 | How much trust educators command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_7 | How much trust religious professionals command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_8 | How much trust medical professionals command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_9 | How much trust entertainers command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| occtrust_10 | How much trust solo creators (YouTubers) command in Korea | ordered scale (may be treated as continuous) | 1868 | 1=very low; 2=fairly low; 3=medium; 4=fairly high; 5=very high |
| journalism_fn_1 | Do internet portals perform the function of journalism? | binary (t test grouping / chi-square) | 1702 | 1=yes, they do; 2=no, they do not (998 = don't know) |
| journalism_fn_2 | Do messenger services perform the function of journalism? | binary (t test grouping / chi-square) | 1585 | 1=yes, they do; 2=no, they do not (998 = don't know) |
| journalism_fn_3 | Do SNS perform the function of journalism? | binary (t test grouping / chi-square) | 1497 | 1=yes, they do; 2=no, they do not (998 = don't know) |
| journalism_fn_4 | Do online video platforms perform the function of journalism? | binary (t test grouping / chi-square) | 1564 | 1=yes, they do; 2=no, they do not (998 = don't know) |
| journalism_fn_5 | Do OTT services perform the function of journalism? | binary (t test grouping / chi-square) | 1493 | 1=yes, they do; 2=no, they do not (998 = don't know) |
| source_recognition | Knows which outlet produced the online news they saw | ordered scale (may be treated as continuous) | 1315 | 1=do not know at all; 2=mostly do not know; 3=half and half; 4=mostly know; 5=know very well (−1 = did not use internet news) |
| social_trust | How trustworthy Korean society is in general | ordered scale (may be treated as continuous) | 1868 | 1=cannot be trusted at all; 2=tends not to be; 3=half and half; 4=tends to be; 5=very trustworthy |
| paid_news | Paid for online news in the past year | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |

| Variable | What it measures | Role | n | Values |
|---|---|---|---|---|
| willing_pay | Would be willing to pay for online news in future | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| civic_1 | In the past year: signed a petition | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| civic_2 | In the past year: made a donation | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| civic_3 | In the past year: did volunteer work | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| civic_4 | In the past year: expressed an opinion online on a political or social issue | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| civic_5 | In the past year: attended a rally or demonstration | binary (t test grouping / chi-square) | 1868 | 1=yes; 2=no |
| press_eval | Press evaluation index — mean of press_eval_1 to press_eval_5, higher = more positive (Cronbach's α = .76) | continuous | 1868 | 1.00–5.00 |
| press_role | Press role performance index — mean of press_role_1 to press_role_7, higher = performs better (α = .82) | continuous | 1868 | 1.00–5.00 |
| press_problem | Reporting problems index — mean of problem_1 to problem_8, higher = sees problems as more serious (α = .89) | continuous | 1868 | 1.00–5.00 |
| journalist_eval | Journalist evaluation index — mean of journalist_1 to journalist_4, higher = rates journalists higher (α = .69) | continuous | 1868 | 1.00–5.00 |

*Source: Korea Press Foundation (한국언론진흥재단), 2025 Media Users Survey (2025 언론수용자 조사), N = 6,000 adults aged 19 and over, fielded 2025 (a random sample of 1,868 is used here). Raw data and the Korean questionnaire are published free of charge on data.go.kr and kpf.or.kr. The survey weight has been omitted from this extract, and all analyses in this course are unweighted.*
